CPYRGHT LEON DENNEN Foreign News Analyst

NEW YORK (NEA)—The KGB is in trouble again. Russia's secret police agency has had another spell of bad luck in recent months and as a result a new purge is reported to be brewing in the Kremlin.

A curt state-Moscow's Pravda in May announced H that Vladimir Semichastny, a former leader of the Young Communist League Dennen

(Komsomol), lost his job as chief of the KGB and "transferred to other work." He was succeeded by Yuri Andropov, a burly man of 52, who is (or was then) a friend and close associate of Lenoid Brezhnev, head of the Russian Communist

Now, according to East European Communists, Andropov is also in trouble and probably on his way out.

#### Strange Deaths

The removal of Semichastny in May was obviously related to the struggle for power between his patron and mentor, Alexander Shelepin, and Brezhnev. But the Kremlin, it seems, also held Semichastny responsible for the death of Maj. Gen. Lukshin, a senior officer of the KGB.

An unprecedented official statement by the Kremlin revealed only that Lukshin "died tragically in the course of his duties." However, East Euro-pean Communists insisted that he was killed near Khabarovsk, less than 50 miles from Red China, in a battle with Mao Tsetung's secret agents.

They recalled that the decline of Shelepin, Semichastny's predecessor in the KGB, coincided with the assassination of another high-ranking officer of the secret police, Maj. Gen. Georgy Naimushin, who was also reported to have died "while car-rying out his service duties."

### "Young Turks" Lose Out

The demotion of the "young Turks" — Shelepin, Semichastry and a third top official of the KGB, V. S. Tikunov - marked

oung Communist League. There is no doubt that the oung Turks were better politicins than officials of the secret olice. During their rule of the GB the United States CIA nanaged to secure the conjuctation of Col. Oleg Penkovsky, a pp Russian secret agent who rovided an invaluable street. rovided an invaluable stream f information to the West unl he was caught by the KGB nd executed. In addition, numrous Soviet agents had also een flushed out in Western

It was therefore the task of ndropov to tighten security easures and, above all, stop e defection of Moscow's seet agents.

Undoubtedly, too. Brezhnev slept better at night, knowing that the KGB was in the hands a man he selected, rather in in the hands of Khrushelev's choice from the ranks of the Komsomol.

#### mificant Defection

But Andropov was in office y three months when Yuri ginov, a Soviet spy who posed a Canadian citizen, defected South Africa. He was an imtant agent who confessed to ionage in 23 countries.

hen came another blow for which Andropov was held respone. Stalin's daughter, Svetlana luyeva, cluded the KGB's espread network and finally nd asylum in the United States.

ut the greatest blow to Andropov's prestige was the redefection in West Germany Lieut Col. Yevgeny Runge. ugh probably not as import-an agent as Col. Penkovsky, ge operated for many years cient KGB organizations in t Germany.

unge is now in the United

States undergoing Interrogation by American intelligence of-ficials. It was his defection, it is believed, that is the main reason for Andropov's plight.

Runge faced a problem in fleeing. The KGB usually holds a secret agent's family in hostage to prevent defection. But so sure was Andropov of Runge's loyalty that he permitted him to take his wife and son abroad.
